

INTRODUCING THE R-SERIES JPC

CRYE PRECISION™

R-SERIES JPC HIGHLIGHTS

- A truly modular system with mission specific scalability.
- Updated cable management for current comms systems.
- Designed to handle the heavier load carriage of today's warfighter.
- Streamlined attachment methods keep gear closer to body.
- Accommodates multiple plate sizes and configurations.

R-SERIES COMPONENTS

R-SERIES JPC

The R-Series JPC continues the tradition of being a lightweight, minimal armor carrier designed for maximum mobility, weight savings, packability and comfort. Built for added load and support, the R-Series JPC allows for maximum capability of carrying and concealing radios and communication cables. Front channelized Velcro slot allows for use with the structural summerbunds which supports heavier loads and can be used with our StKSS structural support system. Interior slots on the inside front and back of the carrier add additional capability for load carriage options keeping the system as low profile as possible.

R-SERIES ASSAULT HARNESS

The R-Series Assault Harness brings a new level of modularity to the R-Series assault system. With numerous attachment points and ease of adjustment the R-Series Assault Harness allows for multiple configurations. Compatibility with R-Series Zip-On Pack and Harness Adapter allows operator to configure a modular minimalist plate carrier system.

R-SERIES 3-BAND STRUCTURAL CUMMERBUND

The R-Series 3-Band Structural Cummerbund provides rigidity and structure for supporting vest systems with StKSS. It offers three rows of MOLLE for mounting pouches on the inside or outside and can be used with AVS pouches, AVS, SPC and R-Series JPC vests. Small low profile shock cord retainers help keep the attachment in the rear clear of snag hazards.

R-SERIES 2-BAND STRUCTURAL CUMMERBUND

The R-Series 2 Band Structural Cummerbund provides rigidity and structure for supporting vest systems with StKSS. It offers two rows of MOLLE for mounting pouches on the inside or outside and can be used with AVS pouches, AVS, SPC and R-Series JPC vests. Small low profile shock cord retainers help keep the attachment in the rear clear of snag hazards.

R-SERIES HARNESS ADAPTER

The R-Series Harness Adapter is the base component for several different configurations. The outside front accepts any detachable Flap. The inside stretch pocket can quickly fit a size appropriate plate using either the 2" retainer strap that is built or 3 additional M4 mags with the M4 Mag Retainer. The rear is also compatible with the Plate Cover so the system can be turned into a lightweight minimal plate carrier with the Assault Harness.

R-SERIES PLATE COVER

The R-Series Plate Cover is a lightweight plate topper that is used with the R-Series Harness Adapter to convert your chest rig into a lightweight, low-profile minimized plate carrier. Interior slots behind the center top loop placard allow for an easy solid attachment of an ATA flip down adaptor. The low-profile design allows for easy packability and storage.

R-SERIES M4 JUMP FLAP

The R-Series M4 Jump flap adds new versatility over traditional detachable flaps. The streamlined flap design holds three 30 rd magazines with side loops for a secure closure. The bottom slip pocket provides an area for storing sensitive items or allows for Velcro-in side pouches compatible with the R-Series JPC to be used as well. Additional hardware is provided for setting up as a minimal chest rig.

R-SERIES RADIO SIDE POUCH

The R-Series Radio Side Pouch brings a whole new level of comfort when carrying a radio. The Velcro-in side attachment system allows for a secure, streamline fit to the vest. An ambidextrous design allows the user to place the pouch on the right or left, front or back. Front $\frac{3}{4}$ " side release buckle with Velcro allow for quick and easy change of battery without having to take the radio out of the pouch. Minimized front connection will allow for maximum cooling of radio. Fits PRC 163,152 and 148 radios.

R-SERIES RADIO MOLLE POUCH

The R-Series Radio Pouch combines all the great features as the R-Series Radio Side Pouch with the ability to attach to PALs type platforms. Front $\frac{3}{4}$ " side release buckle with Velcro allows for quick and easy change of battery without having to take the radio out of the pouch. Minimized front connection will allow for maximum cooling of radio. Fits PRC 163,152 and 148 radios.

R-SERIES ZIP-ON PACK

The R-Series Zip-On Pack is the latest in load carriage versatility. Multiple attachment points allow for conversion in to several different vest configurations. An inside pocket with plate retention straps allow user to carry a ballistic plate along with radio and hydration. Multiple comm ports on the inside allow for routing comm cables without causing snag hazards.
